Ultramid® A3WG6

PA66-GF30 BASF

Glass fibre reinforced and heat aging resistance injection moulding grade for machinery components and housings of high stiffness and dimensional stability such as lamp socket housings, cooling fans, insulating profile for aluminium window frames, and different automotive powertrain parts. A3EG6 is the preferred grade for producing electrically insulating parts.
The products can also be offered as BMBcert™ and/or Ccycled™. Due to the Massbalance approach the product properties do not change.
